### **Demonstration of Complying with Applicable Service Quality Standards and Consumer Protection Rules For Voice and Broadband**

In establishing this certification in its *2005 ETC Order*,<sup>1</sup> the FCC found that an ETC must make “a specific commitment to objective measures to protect consumers.”<sup>2</sup> The FCC found that for wireless ETCs, compliance with CTIA’s Consumer Code for Wireless Service would satisfy this requirement” and that the sufficiency of other commitments would be considered on a case-by-case basis.<sup>3</sup> In this context, the FCC stated, “to the extent a wireline or wireless ETC applicant is subject to consumer protection obligations under state law, compliance with such laws may meet our requirement.”<sup>4</sup>

Mound Bayou Telephone & Communications, Inc. (“Company”) hereby certifies that it is complying with applicable service quality standards and consumer protection rules. The Company is subject to consumer protection obligations under state law and pursuant to the orders in Mississippi Public Service Commission Docket No. 2005-AD-662. These obligations include, but are not limited to, the following: (1) filing a Local Exchange Tariff pursuant to the requirements of Mississippi Public Service Commission which disclose rates, terms and conditions of service to customers; (2) adherence to state consumer protection requirements governing telephone providers under Title 39 Utilities, Part III Rules and Regulations Governing Public Utility Service , Subpart 1, General Rules, and Subpart 3, Special Rules – Telephone Companies, including requirements

<sup>2</sup> *Id.* at para. 28.

<sup>3</sup> *Id.* The FCC noted that under the CTIA Consumer Code, wireless carriers agree to: “(1) disclose rates and terms of service to customers; (2) make available maps showing where service is generally available; (3) provide contract terms to customers and confirm changes in service; (4) allow a trial period for new service; (5) provide specific disclosures in advertising; (6) separately identify carrier charges from taxes on billing statements; (7) provide customers the right to terminate service for changes to contract terms; (8) provide ready access to customer service; (9) promptly respond to consumer inquiries and complaints received from government agencies; and (10) abide by policies for protection of consumer privacy.” *Id.* at n. 71.

for customer service, billing, consumer complaints, rates and charges, and under Miss. Code Ann. Title 77, Chapter 3 statutes; and (3) truth-in-billing requirements; and (4) CPNI, Red Flag Rules and other applicable federal and state requirements governing the protection of customers' privacy.

Company is subject to consumer protection obligations for broadband services under federal law. These obligations include, but are not limited to, the following: public disclosure of accurate information regarding network management practices, performance, and commercial terms of broadband internet access services; as a means of providing sufficient information for consumers to make informed choices regarding use of such services, and for content, application, service and device providers to develop, market, and maintain internet offerings as specified in F.C.C. 47 C.F.R. Part 8 §8.3. The Company furthermore will comply with all requirements set forth in the *2015 Open Internet Order*.

**Demonstration of Ability to Function in Emergency Situations for Voice and Broadband**

Mound Bayou Telephone & Communications, Inc. (“Company”) hereby certifies that it is able to function in emergency situations as set forth in §54.202(a)(2)<sup>1</sup> and pursuant to orders in Mississippi Public Service Commission Docket No. 2005-AD-662. The Company’s network is designed to remain functional in emergency situations without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations as required by Section 54.202(a)(2). The Company can reroute traffic around damaged facilities. Changing call routing translations will also allow the Company to manage traffic spikes throughout its network, as emergency situations require.

Specifically, each central office building is supplied with standby generators and battery back-up that enable the central office to keep running until power is restored so long as fuel is available, or until system changes are made to reroute traffic. The Company has battery backup at all office locations and in its electronic equipment sites. Length of run time is determined by the equipment serving the area and the number of customers working out of the equipment. The company’s standby generators and battery back-up support both voice and broadband network equipment should an emergency situation occur.

---

<sup>1</sup> Section 54.202(a)(2) requires ETCs that are designated by the Commission to “demonstrate its ability to remain functional in emergency situations, including a demonstration that it has a reasonable amount of back-up power to ensure functionality without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations.”
